Illinois Elementary School Association Announces Partnership with Digital Scoreboards

The Illinois Elementary School Association (IESA) is proud to announce a new partnership with Digital Scoreboards, a leading provider of LED video scoreboard solutions designed to enhance the athletic experience for schools of all sizes.

Through this partnership, IESA and Digital Scoreboards share a commitment to supporting member schools, athletic administrators, and the student-athletes and communities they serve. Digital Scoreboards offers a full line of indoor and outdoor video scoreboards, mobile LED displays, and Wall of Fame video displays, backed by the industry's best service, warranty, and financing options. As a single-source partner, Digital Scoreboards manages everything from manufacturing and installation to software, training, and ongoing support — making the process straightforward for schools and athletic departments.

“We are thrilled to partner with the Illinois Elementary School Association and support the incredible student-athletes and communities they serve,” said Chris Kirn, President and CEO of Digital Scoreboards. “Our mission has always been to make professional-grade scoreboard solutions accessible to every school, regardless of size or budget. Through this partnership, we look forward to helping IESA member schools elevate their athletic programs, engage their communities, and create game-day experiences their students will remember for years to come.”

Digital Scoreboards has been serving schools across the country since 2014, offering competitively priced LED display systems alongside 365-day technical support and live diagnostics monitoring. For schools looking to extend the impact of their investment beyond the athletic space, Digital Scoreboards also offers DS Academy, a curriculum program that connects athletics and education in meaningful ways.

This partnership reflects the shared commitment of both organizations to providing schools with forward-looking solutions that support education-based athletics and enrich the student experience.
